# Easy learning! Over Easy

Over Easy! The latest innovation in play points by Berliner speaks the typical Urban Design language in form, structure and material.

With its decentralised axis, the wobble platform offers a special challenge. It requires dexterity and coordination to find a firm footing as the plate bounces in every direction. In a unique way, this trains users to be more aware of their bodies and surroundings.

Over Easy can be used by one or more children in a sitting or standing position and offers young users a varied seesawing experience. In addition, the new play point can be used as stepping forms when arranged close to each other.

Rocking, bouncing, balancing – it's all possible with the new Over Easy! For the colours of the ball and surfaces, you can choose from our wide range of colours to find the right design for every situation.
