

Lunia

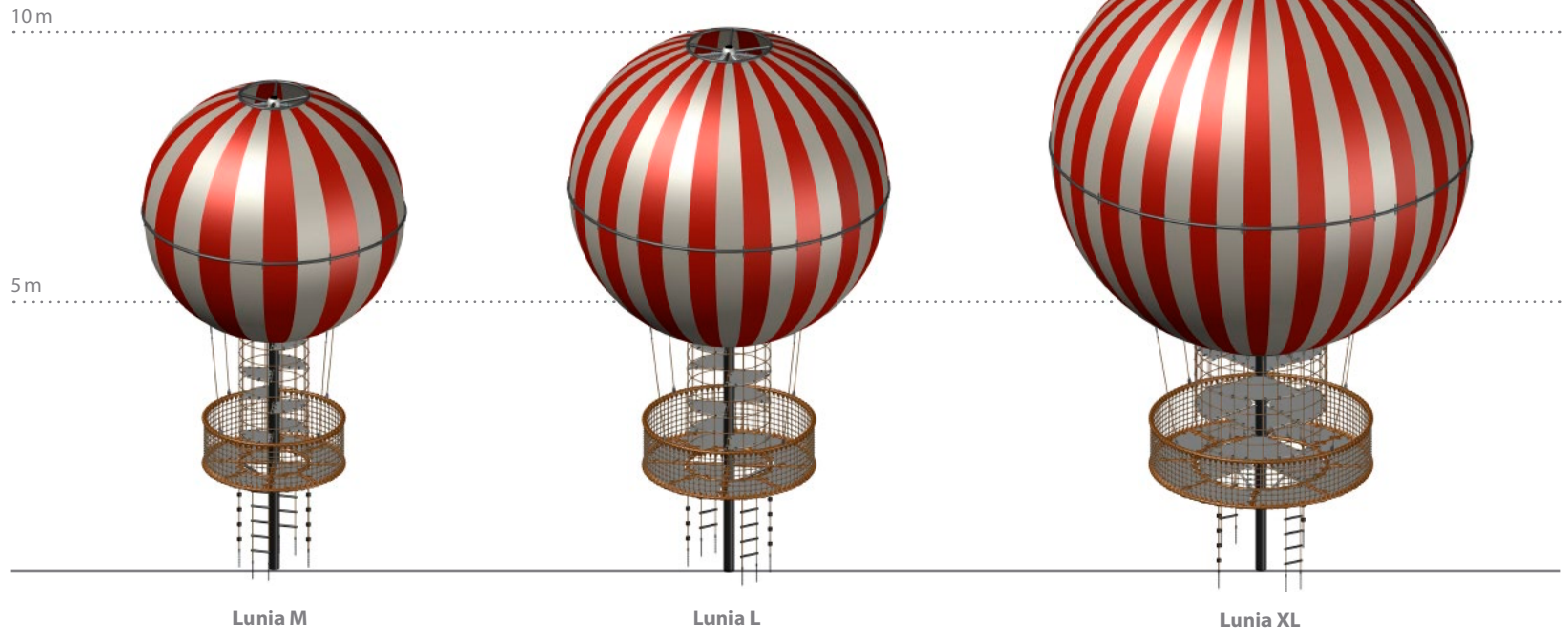

The inner Play Values count, too!

Boundless and reaching high Lunia

Big dreams, big freedom – our new Lunia makes climbing wishes come true. It is available in three different sizes, from 9 metres to a height of almost 12 metres. The spatial net inside can be reached via different ascent possibilities, such as Climbing Plates or Rope Ladders. For even more fun in the three-dimensional climbing net, Flubber or Pendulum Seats can be added. Despite the large play volume, the play structure has a small foot print.

The textile membrane is dirt-repellent, 100 % recyclable and resistant to UV light. In addition, it protects the little climbers from the sun. Lunia can be used as a hot air balloon with basket or without a basket with the design of your choice. The play equipment is also surrounded by a safety grid under the balloon cover.

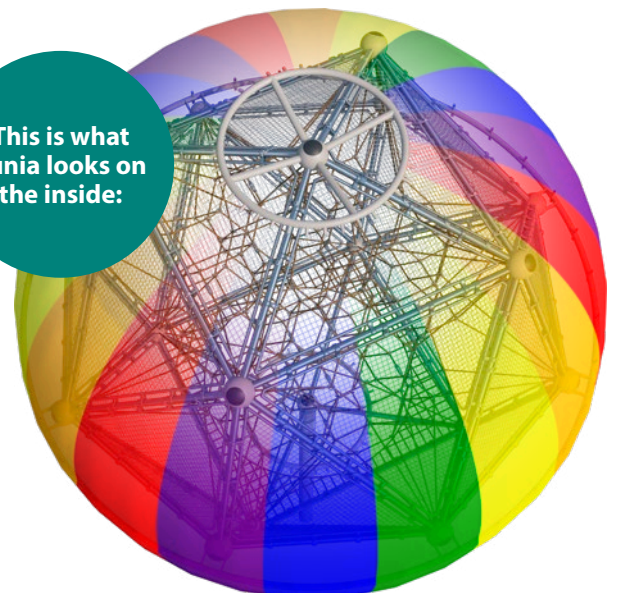

Inspirations for individual Lunia Designs:

Whether it's a globe, a baseball or the logo of your sports club – the membrane is customisable.

This is what
Lunia looks on
the inside:

A young child with blonde hair, wearing an orange long-sleeved shirt and blue jeans, is climbing a large, complex rope net structure. The child is smiling and looking towards the camera. The structure is made of thick brown ropes and metal hardware, with a large black and white geometric shape integrated into the design. The background shows a chain-link fence and other parts of the playground.
